

MP 70 Series Dry/Gas Seal Technology

Panel Mounted

MP72

Buffer gas used with a plan 75 or 76 on an unpressurized dual, dry running containment seal or with a segmental bushing, to dilute leakage for reduced emissions.

PLAN 72 FEATURES

- **Panel Mounted** – Can be stand mounted or mounted to existing structure
- **Stand Mounted** – Vertically mounted onto stand, reduces footprint and eliminates panel obstruction
- API 682 4th edition compliant, CRN available
- Delivery 4-6 weeks, depending on Specifications

Stand Mounted
Dual 72/76

MP74

Barrier gas used on pressurized dual gas seal.

PLAN 74 FEATURES

- **Panel Mounted** – Can be stand mounted or mounted to existing structure
- **Stand Mounted** – Vertically mounted onto stand, reduces footprint and eliminates panel obstruction
- API 682 4th edition compliant, CRN available
- Delivery 4-6 weeks, depending on Specifications

Standard 4 to 6 Week Delivery

MP 70 Series *Dry/Gas Seal Technology*

MP75

Leakage collection system for an unpressurized dual, dry running containment seal in condensing or mixed phase applications and may be used with a plan 72 buffer gas.

PLAN 75 FEATURES

- Plan 75 can be mounted with a stand, incorporating vent piping
- Designed to meet the MAWP of the pump
- API 682 4th edition compliant, CRN available
- U stamp available
- Delivery 4-6 weeks, Depending on Specifications

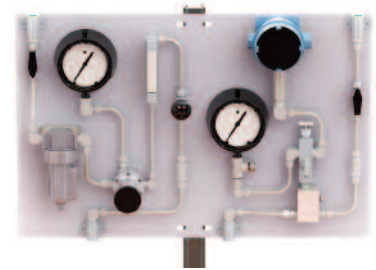

*Stand Mounted
Dual 76*

MP76

Leakage collection system for an unpressurized dual, dry running containment seal in noncondensing applications and may be used with a plan 72 buffer gas.

PLAN 76 FEATURES

- **Panel Mounted** – can be stand mounted or mounted to existing structure
- **Stand Mounted** – Vertically mounted onto stand, reduces footprint and eliminates panel obstruction
- API 682 4th edition compliant, CRN available
- Delivery 4-6 weeks, Depending on Specifications
